DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The New Abstract filed 03/05/04 is objected to be the Examiner for not being in single paragraph form; and should positively recite the invention, such as "A concrete composition" or "A concrete pavement for use in..."

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a

manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Banthia et al. # 5,981,630.

Banthia et al. discloses a concrete pavement (15) having an intended, pre-set strength, pour-able to a desired thickness to resist fatigue, flexure, cracking; and having an energy absorption capability, to durability.

Wherein said concrete mixture being a composite of aggregate (16), a random distribution of reinforcing fibers (10) and having a modulus of rupture near 4.8 MPa.

See col. 1, Ins. 19-67; col. 9, Ins. 10-67.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated Bache # 4,979,992

Bache discloses a lightweight reinforced concrete material for use in highways, streets and roadways, having varying intended traffic load patterns.

Said reinforced concrete comprising: A composite matrix of cement (A) and a plurality of reinforcing fibers and bodies (B, D). Wherein said composite concrete can be formed to a variety of thicknesses, dependent upon the intended traffic load design and having a bending capacity of approximately 150-300 MPa. See cols. 2-4; Figs. 29a-45.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Miller et al. # 3,878,278 discloses a lightweight reinforced concrete. Lutenege et al. # 4,122,704 discloses an applied force testing device. Li # 6,409,423 discloses a prestressed pavement system. Duselis et al. # 6,346,146 B1 discloses a concrete product having high modulus of flexure.
